Automatically calculate all your payroll variables (meal baskets, overtime, travel zone, etc.) using customized macros*.

Why did they choose Alobees?

"Alobees is a solution that has greatly streamlined the sharing and circulation of information within the company. It saved us the equivalent of one post after just a few months. Today, it seems inconceivable to us to go back."

Ludovic Hamoir

Business Manager at BATISOL

"The application saves me an enormous amount of time. I can manage the schedule and keep track of my companions' timesheets at the click of a button! "

Sébastien Petit

Company Director at ARTIPLAC

"When I took over the SAFT company, I found Alobees works in real time and interfaces wonderfully with the Batigest management tool (Sage's most popular software in Europe). Today, everyone in the company uses it, and it has very quickly become an essential tool for all of us."

Christian Garcia

Company Director at SAFT

"I appreciate the way the technical department and management listen to my requests regarding the development of the application".

Patrick Lucas

Company Director at IGC
